DETAILED ACTION

Claims 22 and 23 are pending.

Response to Amendment/Arguments

Applicant's amendment and response filed on Oct. 9, 2007 has been received and entered into the case.

Claims 1-21 and 24-29 have been canceled, and claims 22 and 23 are pending and have been considered on the merits. All arguments have been fully considered.

Applicant's arguments with respect to claim rejection under 35 U.S.C. §102 based on Creson et al. have been fully considered and are persuasive. The rejection of claims 22-23 has been withdrawn.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 22 and 23 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 2 and 11-18, of U.S. Patent No. 6,905,874. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of '874 patent and the claims of the current application are both drawn to a method using the same steps of stimulating and expanding T cells by using anti-CD3 and anti-CD28 antibodies conjugated with paramagnetic beads. Although '874 patent does not particularly teach "regulatory T cells", it would have been obvious that the cell population of '874 patent would comprise "regulatory T cells" because the patent is drawn to generic T cells which encompass regulatory T cells.

Claims 22 and 23 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 12 of copending Application No. 10/187,467. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of '467 application and the claims of the current application are both drawn to a method using the same steps of stimulating and expanding T cells by using anti-CD3 and anti-CD28 antibodies conjugated with paramagnetic beads. Although '467 application does not particularly teach "regulatory T cells", it would have been obvious that the cell population of '467 application would comprise "regulatory T cells" because the patent is drawn to any T cells which would encompass regulatory T cells.

This is a provisional obviousness-type double patenting rejection because the

conflicting claims have not in fact been patented.
